

If you represent an NGO, a Public or a research Institution, contact us to share our methodology and our data base results. We can build together a new research or develop specifically communication campaign in the African sub-Saharan region to support the local institution in the hard work of **the prevention, awareness raising and information campaigns against** the diffusion of Malaria, Tuberculosis and Aids.

To consult the results of the research click on the [Data Base](#) link.

To support our work and our project click on the [Support the project](#) link.
